Generated Sound Correction Rules

$\Delta L = LP(GN) - LP(BN)$

If: $\Delta L \geq 15$, $K_1 = 0$

for 315Hz and below, and 6300Hz and Above, Use Eq. 14

*** $6 \leq \Delta L < 15$, $K_1 = \text{use Eq. 14}$

*** $\Delta L < 6$, $K_1 = 1.26$ and clearly stated in the upper bounds to the PWL

for 400 - 5000 Hz

*** $10 \leq \Delta L < 15$, $K_1 = \text{use Eq. 14}$

*** $\Delta L < 10$, $K_1 = 0.46$ and clearly stated in the upper bounds to the PWL
