# Trench H/C Solutions

Hidden discreetly beneath the floor, our trench solutions deliver powerful heating and cooling with a minimal build-in height of less than 4-inches and a whisper-quiet operation.

With an ultra-responsive design, our trench solutions are ideally suited for perimeter areas that are traditionally difficult to heat and cool.

**jaga** CLIMATE DESIGNERS

Heating only

Heating & Cooling

Trench height

Trench height 2.4"

MICRO CANAL

- Heating capacity up to 4.8 MBH
- Build-in height 2.4"
- Max. length 78 3/4"

Trench height 3.35"

CLIMA CANAL 8

- Heating capacity up to 8 MBH
- Build-in height 3.35"
- Max. length 70 7/8"

Trench height 3.94"

CLIMA CANAL 10

- Heating capacity up to 8 MBH
- Cooling capacity up to 4.2 MBH
- Build-in height 3.94"
- Max. length 70 7/8"

Trench height 5.1"

CLIMA CANAL 13

- Heating capacity up to 21.1 MBH
- Cooling capacity up to 10.5 MBH
- Build-in height 5.1"
- Max. length 110"
- 4-pipe configurations available as an option

Trench height 7.5"

CLIMA CANAL 19

- Heating capacity up to 21.8 MBH
- Cooling capacity up to 14.4 MBH
- Build-in height 7.5"
- Max. length 110 1/4"
- 4-pipe configurations available as an option

Heating capacity:  
 120 °F entering water  
 100 °F return water  
 65 °F entering air

Cooling capacity:  
 45 °F entering water  
 55 °F return water  
 75 °F entering air
